

- 1 Setup All Files in CMYK
- 2 Create artwork at 25% of actual size
- 3 Create a single page document in a high resolution PDF without compression
- 4 All layered files should be flattened and fonts converted to "outlines"
- 5 All scans and bitmap images should be converted to CMYK and placed in the 25% document at 100% at 300dpi. Lower resolution images may result in pixilation on the print.
- 6 Setup all files with a 5mm bleed on all edges.

Proofs and Colour matching:

We will attempt to match any colour proofs supplied, however the four colour process can only reproduce a certain range of colours, e.g. it cannot reproduce all Pantone colours. If colour matching is critical, please provide an accurate printout or pantone colour reference.
